## Why the West Lusts After Ukraine — Back to the Future

by tts-admin | Sep 12, 2024 | 16 comments

## Larry Johnson – SONAR 21, Sept 10, 2024

[NOTE: I wrote the following piece more than two years ago — June 13, 2022, to be precise. While Ukraine has been shattered compared to what it was in February 2022, the following facts help explain why the West is so intent on controlling Ukraine.]

Until Joe Biden took office I thought that George W Bush had dibs on the “stupidest foreign policy blunder in history” award. His decision to invade Iraq rather than eliminate Al Qaeda hurt the United States and fueled international terrorism. But leave it to Joe Biden to one-up W by imposing sanctions on Russia that are inflicting an economic holocaust on the United States and Europe. Heck of a job, Joe.

The ostensible reason for “punishing” Russia with sanctions that actually pummel the west was Putin’s invasion of Ukraine. Now we all know that Ukraine was/is the poorest nation in Europe. Right?

Ukraine is one of the worst off countries after the collapse of the USSR. It is the poorest country in Europe despite having a huge aerospace industry, natural resources and some of the most fertile land for agriculture. During the

The Alternative View Presents Thomas Sheridan

Date: 20 October 2024

Time: 10:00 - 16:15

communist era, Ukraine was the breadbasket of the Soviet Union. Despite all this, Ukrainians have experienced terrible famines such as the Stalinist Holodomor.

Today, the situation is not much better. Apart from enduring a war with Russia, its political system is particularly corrupt. Almost the entire economy is in the hands of big oligarchs: millionaires who amass fortunes thanks to their connections with political power.

Let me share with you some critical facts about Ukraine and its economic potential. When you consider these facts you will likely wonder why Ukraine is not one of the richest nations in Europe.

#### UKRAINE IS:

- 1st in Europe in proven recoverable uranium ore reserves;
- 2nd place in Europe and 10th place in the world in titanium ore reserves;
- 2nd place in the world in terms of explored reserves of manganese ores (2.3 billion tons, or 12% of world reserves);
- The 2nd largest iron ore reserves in the world (30 billion tons);
- 2nd place in Europe in mercury ore reserves;
- 3rd place in Europe (13th place in the world) in terms of shale gas reserves (22 trillion cubic meters)
- 4th place in the world in terms of the total value of natural resources;
- 7th place in the world in coal reserves (33.9 billion tons)

Ukraine is an important agricultural country:

- 1st in Europe in terms of arable land area;
- 3rd place in the world by the area of chernozem (25% of the world volume);
- 1st place in the world in the export of sunflower and sunflower oil;
- 2nd place in the world in barley production and 4th place in barley export;
- 3rd largest producer and 4th largest exporter of corn in the world;
- The 4th largest potato producer in the world;
- The 5th largest rye producer in the world;
- 5th place in the world for honey production (75,000 tons);
- 8th place in the world in wheat exports;
- 9th place in the world in the production of chicken eggs;
- 16th place in the world in cheese exports.

Ukraine can meet the food needs of 600 million people.

Ukraine was an important industrially developed country:

- 1st in Europe in ammonia production;
- The 2nd and 4th largest natural gas pipeline systems in the world;
- 3rd largest in Europe and 8th in the world in terms of installed capacity of nuclear power plants;
- 3rd place in Europe and 11th in the world in terms of the length of the railway network (21,700 km);
- 3rd place in the world (after the USA and France) in the production of locators and navigation equipment;
- 3rd largest iron exporter in the world;
- The 4th largest exporter of turbines for nuclear power plants in the world;
- The world's 4th largest manufacturer of rocket launchers;
- 4th place in the world in clay exports;
- 4th place in the world in titanium exports;
- 8th place in the world in the export of ores and concentrates;
- 9th place in the world in the export of defense industry products;
- The 10th largest steel producer in the world (32.4 million tons).

I found this list stunning. A country with these natural riches should be on top of the world economically. But Ukraine lags the rest of Europe. The explanation is simple—western politicians and businessmen, such as Mitt Romney, John Kerry, Joe Biden, Nancy Pelosi, John McCain and a legion of others, have their hooks in Ukraine and are expropriating Ukrainian wealth for their own enrichment.

Consider the fact that Ukraine is the 4th largest exporter of titanium. What are the major products that rely on titanium?

**Aerospace industry**—In western countries, such as the United States, **60%** of titanium materials are used in the aerospace field. However, with the rapid development of Asian aerospace in recent years, the consumption of titanium in the aerospace field will increase accordingly.

**Automobile industry**—The preferred way to reduce the weight of automobiles is to replace traditional automotive materials such as steel with high-strength lightweight materials such as **aluminum, magnesium, and titanium.**

**Medical industry**—**Titanium** has a wide range of applications in the medical field. Titanium is close to human bones, has good biocompatibility to human tissues, and has no toxic side effects. Human implants are special functional materials that are closely related to human life and health. Compared with other metal materials, the **advantages of using titanium** and titanium alloys are mainly the following: lightweight, low elastic modulus, non-magnetic, non-toxic, corrosion resistance, high strength, and good toughness.

Revisited

PKinPanama on 9.11 X 23 = speechlessness

**Chemical industry**—Titanium has become one of the main anti-corrosive materials in chemical equipment and has established his corrosion resistance status in chemical equipment. As an ideal material in chemical equipment, titanium has also attracted more and more attention from engineering technicians.

**Marine engineering**—Titanium has excellent corrosion resistance to seawater and is widely used in seawater desalination, ships, marine thermal energy development, and subsea resource extraction.

**Sports industry**—Titanium is used in sporting goods because of its lightweight and high strength. The use of titanium has gradually expanded from the earliest tennis rackets and badminton rackets to golf heads, clubs, and racing cars.

With this bounty of natural resources Ukraine, in theory, should have been in the catbird's seat and surpassed Germany as an economic powerhouse. But corruption and insider dealing took precedence and the Ukrainian people suffered while the Biden, Clinton, Kerry and Romney families enriched themselves.

I have not yet done the deep dive on the portions of Ukraine that produce these various minerals and chemicals, but I suspect much of the territory Russia is occupying in Ukraine is where many of these riches are located. Given what Putin has accomplished in Russia during the last 20 years in wresting monopoly control from the hands of insatiable oligarchs and well-connected western politicians and corporations, I am betting that those portions of Ukraine that are now positioned to become part of Russia will have a brighter, richer future.

This will only make Russia stronger economically. Matt Bowen and Paul Babbar, writing in The Hill, identify a potentially dire challenge the west faces on the nuclear power front:

Western leaders need to immediately consider their exposure to Russian nuclear exports and take steps to reduce it or face another energy shock at the hands of Putin.

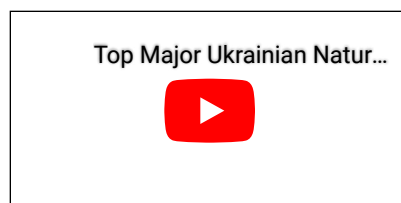

There are several segments of the commercial nuclear value chain where a Russian supplier could impact the availability of a reactor in the West to provide power. For nuclear fuel, these include uranium mining and milling, conversion, enrichment and fuel fabrication. For existing Russian-designed reactors, they include providing unique original equipment manufacturer spare parts and services.

Russia has a significant market share in many of those pieces of the nuclear supply chain through its state-owned nuclear company Rosatom. For that reason, various countries around the world are caught in a challenging situation, including the U.S. They may want to extricate themselves from buying nuclear energy supplies from Rosatom to reduce supply chain risk and to stop sending money to Russia, but at the same time, they currently rely on Russian services and materials to run their reactors.

<https://thehill.com/opinion/energy-environment/3519264-whats-at-risk-due-to-russias-nuclear-power-dominance/embed/#?secret=IFnbYOQixm>

If you have labored under the false narrative that Russia is an economic midget trying to play with the so-called "first world big boys", these facts show that you have been fed a massive, false narrative. Russia's natural resources exceed those of Ukraine. A united Russia and Ukraine represents a true economic powerhouse. Those two countries actually make things and have the internal resources necessary to produce them. The United States and Europe do not. And there are no stashes of alternative supplies in other countries capable of replacing what Russia and Ukraine mine and harvest. This is why the United States and Europe are desperate to weaken Russia. The writing is on the wall for all to read.

[NOTE: I did not include the following videos in my original article, but I think they are useful in helping you understand the financial importance of the Donbass.]

Here is a great geological overview of the Donbass, which is the heart of Russia.

Ford motor company files patent to eavesdrop on drivers' conversations

Story by Matthew Field

Ford has filed a patent for technology that can eavesdrop on drivers and passengers to serve them hyper-targeted educational advertising.

The technology would allow the car's infotainment system to listen to "conversations between occupants of the vehicles", which its software could then filter for "keywords or phrases".

New televisions already have something similar and watch for anything which breaches LBGT softer rulings on child sex. The Ford system would learn what adverts "annoy or irritate" based on remarks "spoken by the user when ads are presented to them", while it would be able to recognise the vehicle's occupants based on in-car cameras or microphones and tailor its adverts to each person.

The adverts will show diversity which means black men with white women, and have homosexual undertones for white men. The innovation is currently only a patent and may never be turned into a product. Companies often file numerous patent applications to block rivals from developing competing technologies.

While radio stations once provided localised adverts, ever more personalised adverts have been creeping into people's cars. Navigation apps like Google Maps and Waze have included sponsored pins for petrol stations or shops that appear during a journey. Music streaming apps connected to the car's infotainment system may also include tailored adverts with NWO subliminals.

Ukraine Inc.

Carl Jones on September 12, 2024 at 9:18 am

Larry is wrong.

First, I'm on the fence with Larry. When he introduced email logins, my comments took 5 hours to clear. He, or his controllers didn't want my comments up for a largely US audience.

As to Ukraine and it's resources. There are no serious resources problems, in fact, take oil, there's loads of oil in capped wells.

The reason why UKraine never made use of their resource wealth, is that City Crime Cartels and Wall Street mobs did need it at this time. Maybe in 30/40yrs time, it might be different.

There are two overriding Nazi interests in UKraine. One, weaken Russia, topple the Russian regime, so shell democracies can be installed so Nazi corporation can resource rape the country[s].

The second, to prevent China using its Belt & Road initiative to access Europe. This is essentially a land based trading system. The Nazis are traditionally maritime powers.

The knock on effect of controlling Russian resources, isn't about taking those resources back to Naziland, although some will, no, it's about stopping Russia from exporting cheap oil, gas, food, and hitech to the NFW.

This is why UKraine is a struggle to the death. It has been reported today that Nazi UK has approved the use of long range weapons to be used deep inside Russia, and that these weapons systems will use sheep dipped UK Nazis and Nazi targeting. Imminently, Nazi Amerika will follow, and we have the serious potential that Nazi targets in the UK, EU/NATO, and Nazi Amerika, will be hit.

We are very close to the point where Putin can't provide his arguments for restraint.

Given that MI6 has a very well established long record of carrying out acts of terror, and attempted assassinations, such as 1956 against Nikita Khrushchev in Portsmouth Harbour, which the current UK Nazi regime had no part in, one can see that MI6 would hit any target in Russia.

There's no one at home in Nazi Amerika, and Nazi UK has a very thick twat called Starmer on the front desk shift.

MI6 sees the toppling of the Russian regime and control of Russian resources, as the only winning card for bankrupt Nazi UK. That's how bad things are, and that's why I believe it could go nuclear at any point, even before Christmas, but my guess is after the Russian Christmas, so mid January 2025, maybe a tad earlier.

If you are flying at this time over Europe, your plane will probably fall from the sky. Putin will be cornered to act, or removed. The first attacks will be nuclear armed stealth missiles, and every major Nazi NATO target will be hit, including the US. They will pause to see what's coming, they act accordingly.

We can expect Israel to be hit, South Korea, Japan, and all US carriers will be sunk. Around 9 are in dock, and the others are easy to find. Nazi UK carriers will also be sunk.

Don't forget, the Nazis are also planning to strike first. Fake news reports about fighters landing on Finnish roads, and what I've seen and heard in the mountains of Snowdonia.

If Putin doesn't ram up, he's gone, and then most of the above won't apply, it could just be an all out nuclear strike.

lewis jones on September 12, 2024 at 10:07 am

He does not explain why Ukrainians have no ability to hang on to their wealth; are they some sort of weird slave-being?

Carl Jones on September 12, 2024 at 10:27 am

Distantly connected: a 100m bridge span has collapsed in Dresden.

While there are 1000s of German bridges below basic safety standards, like in most of the Nazi sect, this span collapse could have received a helping hand.

There's no doubt that Russian sympathisers, or even Russian assets are carrying out sabotage operations, in the US, UK, and in Europe, and even the Nazis forecast this to increase.

Just minutes earlier, a tram passed over this bridge. No loss of life. Was this just by chance? I don't think so, and the German authorities would rather it remain a disrepair narrative.

Carl Jones on September 12, 2024 at 10:39 am

Reasons to be cheerful!

On the day that Nazi UK gives the green light for Nazi UK sheep dipped rams to target deep into Russia, there no mention of this in the fake Nazi news media. You should be concerned by this, because the joyful slaughter of Nazis in Kursk, hardly gets a mention. So bad is the Kursk news, that heads of MI6 and the CIA, are out in sheeple view, lying through their blood soaked teeth, but maybe Bill Burns doesn't have any teeth, maybe he has pegs with caps on? Saddam had very good teeth, but the ram pulled from the hole, had terrible teeth. How lies are told.

Observation: all my recent viewings of Trump, look doctored, messed with. What are they preparing us for? We seldom see good images of Trump. Okay, alternative maybe, but since the debate, it's only Harris we see, and when Trump is shown, the image looks messed up with. Just saying.

Nico X on September 12, 2024 at 1:13 pm

More nonsense/disinfo from CIA-KGB man Johnson. ZWOG, Chandala Lubavitch & the Jew central bankers already control Ukraine, just as they do every nation on the planet. They must invent various bogus cover stories for the war to mask its true purpose: a staged coordinated war to liquidate whites aka 'Whiteocide'.

now you know

jerry mason on September 12, 2024 at 1:15 pm

10 to 1 Johnson is a mackerel snapper too.

Paul on September 12, 2024 at 1:38 pm

The west fails to realize that if you kill off most of the Ukrainian population and replace them with third world migrants, the west really isn't the west anymore. So why fight for other colonists?

This is the problem when you let economists rule the world instead of biologists. We need to start coveting our people more instead of coveting untapped resources in other nations.

As Rudolph Hess said: "National Socialism is nothing but applied biology."  
We need to understand that we live in a biological world and that race does matter.

Harold Smith on September 12, 2024 at 4:11 pm

Obviously, Larry's completely wrong. If the corrupt "West" wanted to exploit Ukrainian resources, why couldn't they have done so by way of more legitimate means? For example, China would've come in and peacefully partnered with the government of Ukraine and everybody would've profited from it.

No Larry, "resources" have absolutely nothing to do with it. The war in "Ukraine" is all about one thing and one thing only and that is destroying Russia.

Blow Joe on September 12, 2024 at 5:55 pm

1994 article by Chabad leader Mendel Schneerson:

"Slav, Russian, can be destroyed, but never conquered. That is why this seed is subject to liquidation, and, at first, a sharp reduction in their numbers."

"The Ukrainians would think that they are fighting against the expansionist Russia and struggling for their independence. They will think that they have finally gained their freedom, while they become fully subdued by us. The same will be thought by Russians, as though they defend their national interests to return their lands, "illegally" taken away from them, and so on."

Damien Thorn on September 12, 2024 at 8:06 pm

Paul

The 'West' is ruled by Yids, just like Eurasia. Yids want the white man gone sometime this century. 'Economists' is code for Jews. Nazism failed because it didn't finish eradicating the Semitic virus. It didn't understand that the Jew is only half of the problem, the other half is the Christian—the enemy within, who like Canaris, betrayed the Reich to their Jewish overlords in the Vatican; foolishly imagining that they would be loyal to their race over rabbi Jesus. The only thing left is 'The Book of the Law', which is essentially Fascism/Nazism purified of its various flaws & errors.

Instead of waiting for any reform or fair play on the world stage to come from the US which is the real center and SOURCE for things such as the UN Agendas, 9/11 and the surveillance state, the CO2 global warming fraud, the debt rigging of nations, the Covid crimes, and the many wars on the planet, the people of the world ought to be pressuring their governments to cancel their allegiances and support for all of the superpowers which are extorting and plundering the weaker nations of the world. Who, for instance, is telling the US-led West and Russia to get the hell out of the Ukraine? No one.

The US which controls the largest empire in history is essentially a business empire and the war in the Ukraine is one where only Russian and US centered corporate interests will benefit and maybe even Israel if Russia is too bogged down in that war to continue its support of Syria.

With all of these wars going on, it is clear that the UN does not really help or support nations which are targeted by the superpowers, and people have been fraudulently led to think that the globalist movement will serve to protect the integrity of the lesser nations of the globe, which is an absolute lie. The UN Agendas are simply made-in-corporate-America pretexts to usurp and centralize control over global resources and assets out of the reach of national governments so that they can be reserved for and looted by those major "stakeholder" corporate interests of the world. That is what the WEF is really all about.
